PROFESSIONAL SUMMARY

Computer Science student specializing in IT Program & Project Delivery, Quality Assurance (QA), and Technical Documentation. Experienced in analyzing business requirements and translating them into user manuals, configuration guides, functional specifications, and visual process flowcharts. Skilled in designing and executing functional, regression, and smoke test scripts to ensure software quality across the SDLC. Familiar with Jira, Google Workspace, and Microsoft Office. Strong ability to support end-to-end project delivery through structured QA processes and clear technical documentation. Experienced in maintaining project documentation, reports, and structured tracking artifacts for IT project delivery. Interested in AI-driven systems and automation workflows, with exposure to software testing and system validation processes.

WORK EXPERIENCE

Software Developer Intern

Feb 2026 – May 2026

ORTADEL Technologies Corporation

Ortigas Center, Pasig, Metro Manila

- Designed high-fidelity UI/UX prototypes in Figma for HRIS Leave Management and Payroll modules covering multiple system screens and workflows, improving requirement clarity and accelerating stakeholder validation across iterative development cycles.
- Refactored legacy components into React and Tailwind CSS, improving code maintainability, modular structure, and cross-platform responsiveness, resulting in a more scalable frontend architecture.
- Implemented UI components for leave management and payroll automation features, enhancing system functionality and improving overall user workflow efficiency.
- Executed functional, regression, and smoke test scripts across multiple modules, identifying and documenting critical defects prior to deployment, improving system stability and release readiness.
- Produced structured QA documentation (test plans, bug reports, test results), improving defect tracking efficiency and strengthening communication between QA and development teams.

WordPress Website Developer

Jan 2026 – May 2026

Institute of Arts and Design (IAD)

J.P. Rizal Ext., West Rembo, Taguig City

- Developed and deployed a WordPress website using Greenshift and Popup Maker, translating requirements into a functional system that improved accessibility and user experience.
- Designed UI prototypes in Figma to align stakeholder expectations, reducing revision gaps and improving design-to-development consistency.
- Performed website maintenance and optimization, improving performance stability and ensuring consistent user experience across all pages.

WordPress Website Developer

Aug 2025 – May 2026

University of Makati Educational Foundation Inc. (UMEDFI)

J.P. Rizal Ext., West Rembo, Taguig City

- Re-developed and deployed a WordPress website consisting of multiple pages, functional sections, and user-facing components, improving accessibility, usability, and system reliability based on detailed stakeholder requirements analysis.
- Managed ongoing website maintenance and feature enhancements across multiple pages, modules, and system components, improving system stability, reducing inconsistencies, and ensuring consistent user experience across deployments.
- Produced technical documentation and feature recommendations, improving system scalability and supporting long-term IT project delivery alignment.

PROJECTS

Software Quality Assurance

Aug 2025 – May 2026

*HeronWellnest: A Gamified Student Mental Well-Being Web-Application
With Monitoring Utilizing Random Forest (Thesis)*

- Conducted business requirements analysis and translated system processes into user manuals, configuration guides, process flowcharts, and visual workflow diagrams, improving SDLC documentation completeness.
- Authored comprehensive QA documentation including test plans, functional test scripts, regression test scripts, smoke test scripts, and bug reports, ensuring full test coverage and reducing testing gaps.
- Performed performance testing using JMeter and cross-browser/device testing using BrowserStack, improving system reliability and ensuring stable performance across environments.
- Led IT project delivery through project planning, progress tracking, and stakeholder coordination, improving development workflow efficiency and milestone completion tracking.

Frontend Developer and Software Quality Assurance

May 2024 – May 2025

JotterPal: Task and Note Management Application (Academic Project)

- Conceptualized and produced branding assets, color palettes, and a comprehensive high-fidelity prototype using Adobe Illustrator and Figma, establishing a consistent visual identity and improving design alignment throughout the development process.
- Translated the prototype into a functional Android application using Android Studio and Kotlin, improving usability and delivering a seamless user experience aligned with project requirements.
- Maintained project documentation including requirements records, workflow diagrams, and SDLC artifacts, ensuring consistency and reducing documentation gaps across development stages.
- Coordinated project documentation, timelines, and deliverables, ensuring adherence to project standards and strengthening overall execution and milestone tracking efficiency.
- Created and executed functional and regression testing, identifying defects and ensuring software quality throughout development cycles.

Frontend Developer and Software Quality Assurance

Aug 2023 – Dec 2023

Bookify: Library Management System (Academic Project)

- Produced visual identity and high-fidelity prototypes using Figma and Adobe Illustrator across multiple application components and design iterations, improving UI consistency and ensuring alignment across development handoff stages.
- Developed a functional desktop application in C# using Visual Studio, improving system usability and ensuring reliable application performance.
- Created and executed test cases and tracked project milestones, improving delivery efficiency and ensuring on-time completion of development and QA phases.

EDUCATION

Bachelor of Science in Computer Science

Aug 2022 – Present

(Application Development Elective Track)

University of Makati

J.P. Rizal Ext., West Rembo, Taguig City

Relevant Coursework: Software Engineering, Systems Analysis & Design, Project Management, Information Management, Web & Mobile Development, OOP, Database Systems, Human-Computer Interaction, Probability & Statistics.

SKILLS

- **QA & Testing:** Business Requirements Analysis, Functional Testing, Regression Testing, Smoke Testing, Defect Tracking & Bug Reporting, Test Planning, Test Case Design, Software Development Life Cycle (SDLC)
- **Documentation & Project Delivery:** Technical Documentation, Documentation Management, Requirements Documentation, Visual Workflow Diagrams, Process Flowcharts, User Guide Creation, IT Project Delivery Support, Configuration Guides

- **Tools & Platforms:** Jira, Git/GitHub, WordPress, BrowserStack, JMeter, Postman, Figma, Canva, Adobe XD
- **Productivity Suites:** Microsoft Office Suite (Word, Excel, PowerPoint), Google Workspace (Docs, Sheets, Slides), ClickUp
- **Programming & Frameworks:** HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Bootstrap, Next.js, Kotlin, Java, C#
- **Soft Skills:** Communication, Adaptability, Detail-Oriented, Teamwork & Collaboration
