PROFESSIONAL SUMMARY

Computer Science student specializing in UI/UX Design and Frontend Development, with experience designing user-centered web and mobile applications from concept to implementation. Skilled in creating user flows, wireframes, interactive prototypes, design systems, and high-fidelity mockups using Figma, Canva, and Adobe Creative Suite. Experienced in translating business requirements and user needs into intuitive digital experiences through usability-focused design, stakeholder collaboration, design documentation, and iterative feedback cycles. Passionate about product design, user research, and building scalable digital products that improve user engagement and overall user experience.

WORK EXPERIENCE

Software Developer Intern

Feb 2026 – May 2026

ORTADEL Technologies Corporation

Ortigas Center, Pasig, Metro Manila

- Designed and maintained 20+ high-fidelity UI screens and interactive prototypes in Figma for HRIS Leave Management and Payroll modules, improving stakeholder validation and reducing errors during development.
- Collaborated with developer interns to translate business requirements into user flows, wireframes, and intuitive interface designs.
- Established reusable UI patterns and component structures across 2 major HRIS modules, improving visual consistency and streamlining future interface enhancements.
- Implemented responsive user interfaces using React and Tailwind CSS across multiple workflow screens, ensuring consistency between approved designs and production deployment.

WordPress Website Developer

Jan 2026 – May 2026

Institute of Arts and Design (IAD)

J.P. Rizal Ext., West Rembo, Taguig City

- Designed website page layouts and UI mockups in Figma, translating stakeholder requirements into intuitive and user-centered experiences.
- Developed and deployed a WordPress website using Greenshift and Popup Maker, improving accessibility and usability across multiple pages.
- Conducted design refinements and website maintenance through iterative feedback cycles, ensuring visual consistency and alignment with stakeholder expectations.

WordPress Website Developer

Aug 2025 – May 2026

University of Makati Educational Foundation Inc. (UMEDFI)

J.P. Rizal Ext., West Rembo, Taguig City

- Re-designed and developed a WordPress website with multiple user-facing pages and components, improving usability, accessibility, and overall user experience.
- Managed feature enhancements, maintenance, and documentation activities, supporting visual consistency and long-term scalability.

PROJECTS

Business Analyst

Aug 2025 – May 2026

HeronWellnest: A Gamified Student Mental Well-Being Web-Application

With Monitoring Utilizing Random Forest (Thesis)

- Conducted user research, requirements analysis, and mapped user journeys to define core system interactions, improving clarity of user flows and stakeholder understanding of the application.

- Created workflow diagrams, process documentation, and user-facing guides to support usability, onboarding, and system comprehension across multiple user groups.
- Collaborated with the development team through testing, defect reporting, and project coordination activities, contributing to product quality, usability improvements, and delivery efficiency.

UI/UX Designer & Frontend Developer

May 2024 – May 2025

JotterPal: Task and Note Management Application (Academic Project)

- Conducted user research and designed end-to-end user journeys, user flows, wireframes, and high-fidelity prototypes for a multi-feature task and note management system.
- Translated user insights into a cohesive design system (typography, color palette, icons), ensuring visual consistency across 20+ application screens and workflows.
- Built and tested interactive Figma prototypes to validate usability and navigation flow before development, reducing design revisions and improving implementation accuracy.
- Translated approved UI/UX designs into a functional Android application using Kotlin, ensuring alignment between user requirements, design intent, and final product experience.

UI/UX Designer & Frontend Developer

Aug 2023 – Dec 2023

Bookify: Library Management System (Academic Project)

- Designed high-fidelity prototypes and visual assets using Figma and Adobe Illustrator, improving UI consistency across multiple system components.
- Collaborated with team members to refine designs and developed the final desktop application in C# based on approved interface specifications.

EDUCATION

Bachelor of Science in Computer Science

Aug 2022 – Present

(Application Development Elective Track)

University of Makati

J.P. Rizal Ext., West Rembo, Taguig City

Relevant Coursework: Software Engineering, Systems Analysis & Design, Project Management, Information Management, Web & Mobile Development, OOP, Database Systems, Human-Computer Interaction, Probability & Statistics.

SKILLS

- **UI/UX Design:**User Flows, User Journey Mapping, Wireframing, Interactive Prototyping, High-Fidelity Mockups, Design Systems, Responsive Design, Usability Evaluation, Information Architecture
- **Design Tools:**Figma, Canva, Adobe XD, Adobe Illustrator
- **Research & Product Design:**Requirements Gathering, Stakeholder Interviews, User-Centered Design, Design Documentation, Product Discovery, Design Iteration
- **Frontend Development:** HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Next.js, WordPress, Kotlin
- **Collaboration & Project Tools:** Jira, Git/GitHub, ClickUp, Microsoft Office, Google Workspace
- **Soft Skills:** Strong Work Ethic, Willingness to Learn, Professionalism, Attention to Detail, Communication, Teamwork & Collaboration, Adaptability
